

TAP INTO THE WORLD'S LARGEST RESEARCH COMMUNITY

We connect professional researchers with millions of volunteers worldwide, facilitating real results from impractical, or otherwise impossible research.

2.8 M

registered volunteers

1.5 M

classifications per week

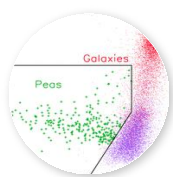

60

published articles per year

500

successful projects

In partnership with our community, your project's results can lead to discoveries, policy impacts, and research publications. These are just a few examples:

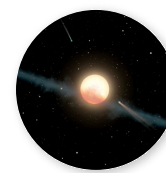

Green Pea Galaxies

New Exoplanets Located

An Earlier Use of 'White Lie'

Boyajian's Star

The Zooniverse Project Builder allows anyone—from researchers and educators to community organizers and students—to create their own crowdsourced research project. With built-in tools for uploading media, creating tasks, setting up workflows, and managing volunteer contributions, the Project Builder lets you to harness the power of the crowd for meaningful data collection and analysis.

Ready to turn your research idea into reality?
We support projects across the following disciplines:
